

Insurance Coverage among Women of Reproductive Age in Virginia

The Affordable Care Act established several provisions aimed at reducing the uninsurance rate, and the number of uninsured women of reproductive age (15–44) in the United States fell from 12.7 million in 2013 to 7.5 million in 2017.

In Virginia, which expanded Medicaid under the Affordable Care Act after 2017, the uninsurance rate fell from 16.95 percent in 2013 to 11.93 percent in 2017. Despite these gains, approximately 199,264 Virginia women of reproductive age remained uninsured in 2017.

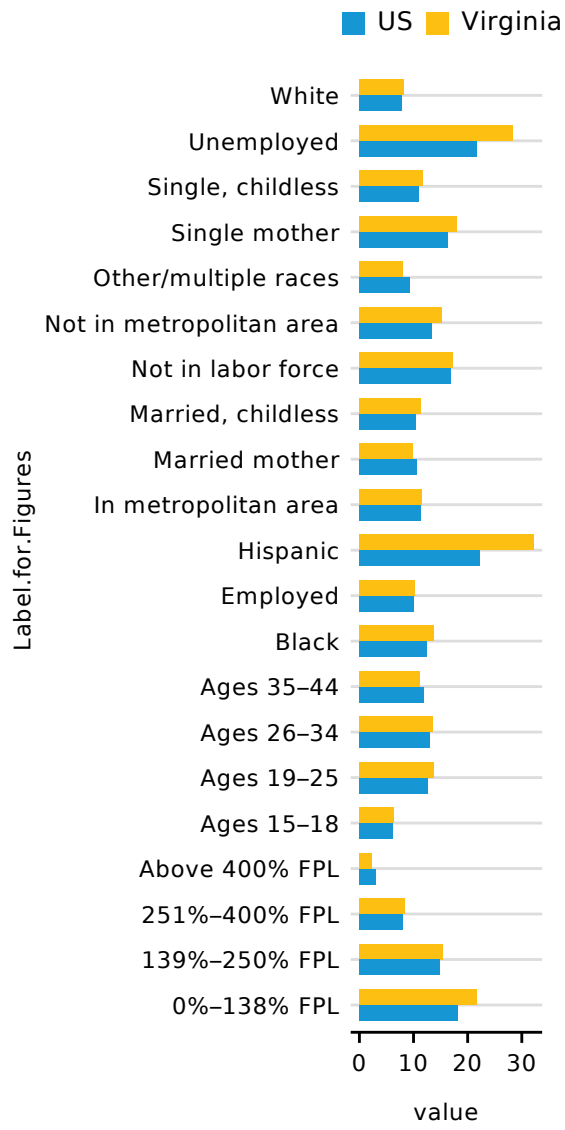

Uninsurance Rate among Subgroups of Women in Virginia and the US, 2017

Uninsured women are vulnerable to well-documented access, affordability, and health problems associated with lacking insurance coverage, including potentially limited access to family planning and other reproductive health services.

- Women of reproductive age in Virginia had a higher uninsurance rate (11.93 percent) than similar women nationwide (11.7 percent) in 2017 (figure 1).
- Within Virginia, women ages 15 to 18, women ages 19 to 25, women ages 26 to 34, white women, black women, Hispanic women, women of other/multiple races, married mothers, single mothers, women with incomes at or below 138 percent of the FPL, women with incomes between 139 and 250 percent of the FPL, women with incomes between 251 and 400 percent of the FPL, women with incomes above 400 percent of the FPL, unemployed women, women not in the labor force had higher uninsurance rates than the state average for all women of reproductive age in 2017.
- Reducing the uninsurance rate among women of reproductive age in Virginia may require expanding access to Medicaid or other highly subsidized insurance, as well as targeted outreach and enrollment efforts to subgroups of already eligible women with the highest uninsurance rates.
